PROFESSIONAL SUMMARY

Cybersecurity and AI-focused Information Technology student with hands-on experience in vulnerability assessment, web security testing, and Python scripting. Built a full-stack web vulnerability scanner covering OWASP Top 10 attack vectors and an AI-assisted red team simulation platform demonstrating real-world attack lifecycle stages. Published ML research on phishing detection. Proficient with Git/GitHub, Linux environments, and security monitoring concepts. Effective communicator with strong problem-solving skills and a track record of collaborative, documentation-driven development.

SKILLS

Cybersecurity:	Vulnerability Assessment, Web Security Testing, Threat Analysis, Incident Response Fundamentals, OWASP Top 10, Security Monitoring, Red Team Simulation
Networking:	Network Security Concepts, Protocol Analysis, Directory Exposure Scanning, Security Header Validation
Security Tools:	Burp Suite (familiar), Nmap (familiar), Wireshark (familiar), Web Vulnerability Scanner (built), Phishing Detection System (built)
Programming:	Python (scripting & automation), Java, Data Structures & Algorithms, CRUD Operations
Web & Databases:	HTML, CSS, JavaScript, React, Node.js, Express.js, MySQL, MongoDB, SQLite
DevOps & Tools:	Git, GitHub, Linux, DBMS, OOPS Concepts, Software Engineering
AI / ML:	Machine Learning (Decision Tree, SVM, XGBoost, MLP, Autoencoder), Ensemble Methods, Prompt Engineering
Soft Skills:	Communication, Problem-Solving, Team Collaboration, Report Writing & Documentation, Analytical Thinking

EXPERIENCE

Python & MongoDB Intern — Datapro, Visakhapatnam

Jun 2025 – Jul 2025

- Developed and automated Python scripts for efficient data processing, reducing manual effort in database workflows.
- Designed, created, and managed MongoDB databases; executed CRUD operations to support data-driven applications.
- Integrated Python with MongoDB to build backend logic for real-world data pipelines; documented all processes for team collaboration.

PROJECTS

Web Vulnerability Scanner | Python, React, Node.js, Express.js, SQLite

- Built a full-stack web security testing tool with secure user authentication and role-based access control.
- Implemented multiple vulnerability assessment modules targeting OWASP Top 10 vectors: default credential detection, security header validation, and directory exposure scanning.
- Generated structured security reports and documentation of findings, enabling teams to prioritise remediation.

AI-Assisted Red Team Simulation Platform | React, Node.js, Express.js, JWT, Web Audio API

- Developed a full-stack cybersecurity simulation platform demonstrating real-world attack lifecycle stages (initial access, privilege escalation, lateral movement, data exfiltration) in a controlled environment.
- Implemented AI-based risk analysis engine to evaluate and classify attack severity, supporting threat analysis workflows.
- Collaborated across frontend and backend layers; maintained Git version control and produced technical documentation.

College Management System | Python, MySQL

- Developed a Python application with role-based access for students, faculty, and administrators; implemented user authentication and student record management.

- Used Python for backend logic and database operations, demonstrating software engineering and problem-solving skills.

ACHIEVEMENTS & PUBLICATIONS

Research Publication — Real-Time Phishing Website Detection Using Machine Learning (Nov 2025)

- Built a phishing detection system using 17 URL, host, and content-based features to identify malicious websites.
- Trained and optimised ensemble of ML models (Decision Tree, SVM, XGBoost, MLP, Autoencoder), achieving high detection accuracy and improved resilience against zero-day phishing attacks.
- Demonstrated applied threat analysis and security monitoring through data-driven ML experimentation.

EDUCATION

Bachelor of Technology — Information Technology

GMR Institute of Technology, Visakhapatnam | 2024 – 2027 | CGPA: 9.4

Diploma — Computer Engineering

Behara Polytechnic | 2020 – 2024 | CGPA: 8.9

CERTIFICATIONS

- Prompt Engineering for ChatGPT — Vanderbilt University / Coursera
- Introduction to Generative AI — Google Cloud / Coursera
- Micro-Certification: Welcome to ServiceNow — ServiceNow
- Internship Certification in Core Python & MongoDB — Datapro
