Career Objective

Aspiring Information Technology professional with strong foundations in Python programming, databases, and cybersecurity. Seeking an entry-level IT or cybersecurity role to apply skills in software development, data analysis, and threat detection while contributing to secure and scalable systems.

Education

- **Bachelor of Technology**, GMR Institute of Technology
2024-2027
Branch: Information Technology — CGPA: 9.4
- **Diploma Polytechnic Education**, Behara Polytechnic
2020-2024
Stream: Computer Engineering — CGPA: 8.9

Internships

Core Python & MongoDB, Datapro, Vishakhapatnam
(Jun 2025 – Jul 2025)

- Developed and automated Python programs for efficient data processing.
- Designed, created, and managed MongoDB databases.
- Executed CRUD operations and integrated Python with MongoDB to support data-driven applications.

Publications

Real-Time Phishing Website Detection Using Machine Learning (Nov 2025)

- Built a phishing detection system using 17 URL, host, and content-based features.
- Trained Decision Tree, SVM, XGBoost, MLP, and Autoencoder models with ensemble optimization.
- Achieved high detection accuracy and improved resilience against zero-day phishing attacks.

Projects

Web Vulnerability Scanner

- Developed a full-stack web vulnerability scanner with secure user authentication and role-based access control.
- Implemented multiple security testing modules including default credential detection, security header validation, and directory exposure scanning.
- Used React.js, Node.js, Express.js, and SQLite for frontend development, backend logic, and database management.

AI-Assisted Red Team Simulation Platform

- Developed a full-stack cybersecurity simulation platform to demonstrate real-world attack stages in a safe and controlled environment.
- Implemented attack simulation modules including initial access, privilege escalation, lateral movement, and data exfiltration with AI-based risk analysis.
- Used React.js, Node.js, Express.js, JWT authentication, and Web Audio API for frontend development, backend logic, security, and interactive visualizations.

College Management System

- Developed a Python-based application with role-based access for students, faculty, and administrators.
- Implemented user authentication, student records, attendance tracking, and course management.
- Used Python for backend logic and database operations.

Areas of Interest

- Cyber Security
- Web Development
- Database Management System
- Teaching and Mentorship

Skills

Programming Languages

Python, Java, Data Structures and Algorithms

CS Core

DBMS, Software Engineering, OOPS Concepts, Problem Solving

Frontend-Backend

HTML, CSS, JS, React, MySQL

Certifications

- Micro-Certification - Welcome to ServiceNow -ServiceNow [🔗](#)
- Prompt Engineering for ChatGPT – Coursera [🔗](#)
- Introduction to Generative AI – Coursera [🔗](#)
- Internship in Core Python & MongoDB – Datapro [🔗](#)

Soft Skills

- Communication
- Leadership
- Team Collaboration
- Time Management
- Adaptability

Languages Known

- English
- Telugu
